

# CONGRATULATIONS! YOU NEED TO IMPLEMENT AN EXERCISE PROGRAM. NOW WHAT?

Wednesday, May 31, 2017 from 8:30 AM—3:30 PM

During our Centers for Medicare & Medicaid Services (CMS) Emergency Preparedness Rule Change Workshops, we have discussed the importance of training and exercises and how FEMA's **Homeland Security Exercise and Evaluation Program (HSEEP)** can assist you with developing your organizations program. HSEEP supports the National Preparedness System by providing a set of guiding principles for exercise programs, as well as a common approach to exercise program management, design and development, conduct, evaluation, and improvement planning. It also address compliance with Joint Commission and CMS standards. Exercises are a key component of preparedness, they provide stakeholders from across the whole community with the opportunity to shape planning, assess and validate capabilities, and address areas for improvement.

Through the use of HSEEP, exercise program managers can develop, execute, and evaluate exercises that address the hazards which have been identified through your Hazard Vulnerability Analysis (HVA) process. Exercise evaluation also assess the ability to meet exercise objectives and capabilities by documenting strengths, areas for improvement, core capability performance, and corrective actions in an After-Action Report/Improvement Plan (AAR/IP).

This workshop will be an informal, abbreviated training to help you become familiar with the forms and process in order for you to conduct an exercise at your facility. Join us to see how this program can benefit you in conducting training and exercises and becoming CMS compliant!
